

## E-Mail:

[mr.raheman@yahoo.com](mailto:mr.raheman@yahoo.com)

## QUALIFICATIONS

- Bachelor of Engineering (Mechanical)
- PMP (training course)
- PG Diploma in Piping Design Engineering (PGDPDE)

## SKILLS

- Capable of dealing with diverse project work groups.
- Ability to interface with all levels of management and service internal customers.
- Budget & Cost Estimation
- Time//Cost/Scope/Risk Management
- Client / Vendor Management
- Contractual Closure and LP Analysis
- Leadership and Organizational skills.
- Analytical thinking, influencing, and problem-solving skills.
- Innovative, Proactive skills.
- Preventive/Corrective maintenance action plan
- Excellent written and verbal communication skills.

## SOFTWARE SKILLS

- Primavera P6
- MS Project
- MS Office
- AutoCAD

## PERSONAL DETAILS

- Birth date :17 Feb '90
- Marital Status : Married
- Nationality : Indian
- Passport : Valid 2034
- Kuwait DL : Valid 2025

## CONTACT DETAILS

- Phone: +965 6904 2795/  
+91-9960 6459 72
- Current Address:  
Abu Halifa KUWAIT.

## A RAHIMAN M. MARASNALLI

### PROJECT PLANNING & CONTROL ENGINEER

**KSE- R. No. 51101**

## OBJECTIVE & PROFILE SUMMARY

Accomplished **Project Planning and Control Engineering** with over **13 years** of comprehensive experience, including 11 years of specialized expertise in Gulf region within EPC sector. I bring a proven track record of executing projects with a focus on efficiency, cost control, and risk management. Proficient in applying PMP methodologies, Proven expertise in managing large-scale refinery maintenance and construction projects, with a strong track record of delivering projects on time and within budget. Demonstrated ability to execute Project Execution Plans, monitor progress, milestones, tracking baselines, preventive, & Corrective action plans. Skilled in cross-functional projects management, technical problem -solving and cost control.

## WORK EXPERIENCE

### Al Dhow Engineering GTCC W.L.L Kuwait

#### Lead Planning Engineer- (Kuwait Oil Company On Contract)

Dec 2022– Present

#### Part of Key Project-

- Construction of Remote Header Manifolds and Associated works in SEK area Kuwait. CN-15052373 -EPC
- Construction of Flowlines and associated works in Burgan & Magwa area Kuwait.- CN-15052245
- Installation of flowline and associated works in south & east Kuwait area Kuwait.- CN-22058800

**Responsible** for various Project Management- Planning and control tasks- Including but not limited to-

- Develop and execute comprehensive project management plans, charters, and strategies, leading to a 15% improvement in project efficiency.
- Conducted risk assessments that identified and mitigated potential project delays, maintaining a 95% on-schedule performance rate.
- Calculated of productivity rate, estimated resources, and assigned task weights as per scope of work.
- Responsible for planning, scheduling, progress monitoring, and cost control activities, with a focus on risk assessments.
- Implement cost-effective operations, earned value management techniques, leading to a 10% reduction in project costs.
- Conducted delay analysis for various claims, successfully negotiated change orders.

## **KDDB General Trading & Contracting Co. W.L.L Kuwait- "Planning Engineer."**

May 2019 to Nov 2022

### **Part of Key Project-**

- Sand Control and Associated Services for North Kuwait Area.
- Pipeline Repair/ Replacement Services at South and East Kuwait Areas- CN-15051302
- Construction of Diesel & Petrol Filling Station KNPC MAB Kuwait- CN C9FP-DI-DI1-K003

**Responsible** for various Project Management- Planning and control tasks- Including but not limited to-

- Prepared project WBS and schedules, creating detailed activity lists and standard documents.
- Developed S-Curves, manpower, and equipment histograms, and resource loading plans.
- Generated EOT (Extension of Time) reports and conducted delay analyses.
- Collaborated with cross-functional teams to streamline project workflows, resulting in a 12% increase in overall project efficiency.
- Developing and implementing preventive and corrective maintenance action plans
- Calculation of productivity rate, resources estimation, task weights, CPM Scheduling,
- Created project budgets and cash flow plans, ensuring smooth operations.
- Reviewed project plans and proposals, collaborated with management to set objectives, and prepared comprehensive weekly and monthly summary reports.
- Identified and reported on critical activities impacting project schedules and ensured compliance with Project Management System (PMS) standards.
- Ensuring clear communication to avoid contractual issues by preparing PMP-based standard PSD for each project.
- Maintained daily / weekly / monthly / quarterly / annually project reports.
- Prepared cost analysis, invoices to stakeholders, invoice preparation & payment clearance follow-up.

## **Consolidated Gulf Company W.L.L, Doha Qatar- "Mechanical Engineer + Planning Engineer."**

May 2011 to March 2019

### **Key EPC Project-**

- Laser Scanning & 3D Modelling of MAA Refinery (Phase-II), Kuwait. -KNPC-
- Site construction & Laser Scanning with 3D Modelling of Al Salam Palace, Kuwait.
- Construction of various foundations at Nagothane refinery Reliance Industry Mumbai

**Responsible** for various Project Management- Planning and control tasks- Including but not limited to-

- Developed project WBS and schedules and project standard documents.
- Ensuring final deliverable submissions met client requirements and obtained approval.
- Conducted site visits, reviewed work orders, and ensured EOD clearance documents were in place.
- Monitored project activities in Oil & Gas sectors for both onshore and offshore locations, integrating laser scanning with 3D modeling and as-built updates.
- Led feasibility studies, site surveys, and prepared tentative pipeline routes and piping layout dwg showing tie-in points, P&ID along with associated facility.
- Project tracking, executing, and ensuring on time delivery according to schedule.
- Daily conducted sessions with team and work allocation to team members
- Reviewed and interpreted different kinds of engineering drawings (P&IDs, GADs, and piping iso. etc.)
- Ensuring clear communication to avoid contractual issues by preparing PMP-based standard PSD for each project.

### **TRAINING**

- Project Management Professional (PMI)
- Scheduling and Planning
- Leadership and Team Management Workshops
- Health, Safety, and Environment (HSE)
