Operations and Logistics Skills

Several years of working experience in the maritime, transport, logistics business industry with broad expertise and skill in managing the scheduling of deliveries and safe supervision of shipments. Proven track record of refining operations and logistics systems to improve efficiency and increase profit.

Managing & Developing Staff

Assisting management and leading country teams and directly line manage the Programs Managers/ Project Team Leaders in the field.

Representation

Maintaining and expanding the safety and operations external profile and influence.

Security

Assuming ultimate responsibility for staff safety and security, maintain overall understanding of the security situation in the areas of operations.

Reporting

Ensure that routine reports and quarterly operational reports for Head Office are prepared by the project teams.

CAREER SUMMARY

✿ As an Assistant Marine Superintendent,

I'm performing a key role in providing support to vessels, fleet teams and the HSEQ Manager in all safety, security, and environmental aspects of the ship operation. Together with my Marine Superintendent colleagues I'm responsible for the ongoing developing of QA system.

Assisting and advising Masters and crew in expediting marine activities on board our fleet. Keeping vessels aware of safety, security and environmental regulations changes as issued by international regulatory bodies. Ensuring that the company's QMS procedures are maintained and developed; Performs internal safety and security audits including report preparation on board and in the office. Follow up on non-conformities and corrective actions. Coordinate responses to Shipboard Safety Committee minutes. Co-ordination of external audits and vetting; Conducting onboard training programs for navigation, cargo handling, safety, security, environmental protection, QMS and company procedures; Assisting with post-fixture, insurance & claims activities. Responsible for the nautical equipments and the communications.

In addition to above, Responsible for the performance of the vessels, working with performance on groups of vessel in a pool of vessels, Involved in the star up of developing the new weather routing onboard program with Sea Planner, Involved in changing to paperless office, giving nautical advice to the people involves in advising vessels regarding the weather on the voyage.

Monitoring and supervision of performance of concerned vessels and crew, Crew training & education, Cargo operations and custody, Attend vessel for major inspection, Marine technical services for outside parties, Observance to Maritime rules and regulation, Implementation of Safety Management System, Statutory requirements relating to marine matters, Co-ordinate with other members of SMD for follow up of remedial/corrective actions, training and technical operation of the vessels, Emergency response, And any other matters designated by Marine Manager, Marine GM, SMD General Manager & Managing Director and Updating, modification and monitoring of the new building ships in the Yangzhou & Kejin ship building yard, China. Conducting internal audits (ISM & ISPS).

Provide support for handling a group of 15 personnel, Perform a general industry trends for discovering the newest technology being used in the marine business, Managing agreements from customers and keeping records for the same, Offering support in the recruiting procedure by performing the first primary circular for the applicants, and confirming it to the HR Administrator in charge, Offering monthly reviews on the performance of the personnel, Managing paperwork for the Senior Sea Superintendent regarding customer agreements, workers agreements, records, etc. Provide support in primary docking and unloading tasks, conducting every week classes on protection precautions.

✿ As an experienced and talented Port Captain & Manager,

I am intimately familiar with key fields such as operations, cargo supervision, stowage planning, safety, security, logistics, business planning, administration, projects and claims. I was planning and coordinating loading and unloading of ships' cargo and was preparing reports on type, amount, and condition of cargo to protect company from claims for damage or shortage: Examines cargo lists to determine types of cargo that can be loaded together. Preparing loading and stowage plan to ensure that weight of cargo is equally distributed in hatches. Informing shippers and supervisors of CARGO CHECKERS of loading time and point, and supervisors of STEVEDORES of cargo to load and location of load; Preparing reports, such as tonnage carried, breakage, overages, and shortages; Acts as representative/ agent of ship-owners in foreign ports.

Paramount to me is the understating an owner's requirements and delivering results to him. I have several years of safe working and handling experience on PCC/ PCTC, Heavy Lift Vessels and Project Cargo Shipments.

During my tenure at Jeddah, Kingdom of Saudi Arabia as "PORT CAPTAIN and ASSISTANT OPERATIONS MANAGER-RORO & CARGO" in the Regional Representative Office of NYK Line I was responsible for co-coordinating the loading and discharging operations to expedite those operations in the quickest and safest way possible, preparing stowage plans, developing relationships and working closely with terminals, stevedores and so on. I was handling the Roro and Project Cargo shipments volume of minimum 45,000 units of different vendors in a month at North Multipurpose Terminal, Jeddah Islamic Port.

In addition to above, I was also managing a pool of heavy lift vessels specializing in the worldwide heavy and special project cargo market. I was also managing and coordinating requirements for Heavy Haul / Over-dimensional / Super Load movements via truck and barge. I was generating the individual reports directly to the Deputy General Manager and Directors. Insuring all third parties are coordinated with no gaps, finding synergies between various moves, acting as the central point of contact/communication for all the parties involved and keep the client fully informed of status. I was handling the Trade Lanes from USA, Europe & Far East to Red Sea.

I ensure the highest technical levels achieved throughout a project and completion is on time and in budget. Onboard under my supervision safety and security conscious environment are always adhered to. Managing a fleet of Vessels or Project for me is a highly rewarding occupation and exceeding an owner's expectations is something for which I constantly strive.

✿ Within my role as a Senior Consultant-Marine,

I carry out all types of Marine surveys on all types on behalf of worldwide clients; these surveys include various ship types Ferries, vehicle carriers, tankers and offshore supply vessels and Jack up and Semi-Sub Rigs.

I also carry out the following: Vessel condition Inspections, Vessel suitability surveys for towing operations or rig moving operations, CMID Inspections and other Client specific surveys, Project Manager on various General Marine Consultancy projects, Jack up/ Semi Sub Rig mover within the Persian Gulf.

I was inspecting vessels to ensure seaworthy condition and advising maintenance and repair activities to correct deficiencies.

I have the ability to work outside in conditions of both hot and cold temperatures as well as inside in an office environment. Ability to board vessels in rough weather and sea conditions, Long hours, ability to travel, weekend duties and 24-hour "on-call" status.
